

I can't configure my AGVoice. Can you help me?

Download the instruction manual in pdf format. It is worth mentioning that the most common cause of bad operation of the helmet and Bluetooth connection is completely eliminated by changing the communication profile of the Bluetooth from Hands-free to Headset, and vice versa.

Is my mobile phone compatible with your AGVoice?

Most mobile phones that have the BT system are compatible with AGV helmets, however don't forget that the functions described may vary depending on the type of mobile phone or the various software evolutions of each phone. If you have difficulties or problems during the connection procedure or during operation we advise you to repeat the connection process several times or try changing the profile from Hands-free to Headset, or vice versa.
